EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Isaac Angres on August 31, 2004.

The application has been amended as follows:

Claims 12-17 were cancelled without prejudice towards further prosecution.

Inventorship

2. In view of the papers filed August 16, 2004, the inventorship in this nonprovisional application has been changed by the deletion of Andre Galarneau.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

Response to Declaration

3. The Declaration filed on August 16, 2004 under 37 CFR 1.131 is sufficient to overcome the Balint reference.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the use of a lactamase as a reporter protein where

Art Unit: 1637

the lactamase can be separated into two different domains, fused to two different interaction domains of heterologous proteins, and reconstituted by binding of the interaction domains to enzymatic lactamase activity. While Cornish teaches a similar method with B-galactosidase and while the well known two hybrid system reconstitutes transcription factor activity upon binding of two interaction domains, the prior art does not teach or suggest that B-lactamase enzymes can be separated into two domains which can be brought into proximity to reconstitute enzyme activity. (Balint was removed as a prior art reference by the 37 CFR 1.131 declaration). This result is unexpected, surprising and would not have been predictable from the prior art. Therefore, the claims are novel and unobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Fredman whose telephone number is (571)272-0742. The examiner can normally be reached on 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on (571)272-0782. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
